

ADHYATAMJOT SINGH

Senior Full Stack Developer | Technical Lead | 6+ Years Dev Experience

adhyatamjot.singh@gmail.com | +91-83760-86993 | github.com/cssavenger | adhyatamjot-singh.eu.org | New Delhi, India

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and Technical Lead with 6+ years of professional software development experience delivering scalable web applications across insurance, fintech, and EdTech domains. Specialised in Angular (RxJS, lazy loading, modular architecture) and Python (FastAPI, Flask) with a strong track record of leading cross-functional teams, improving API performance by measurable margins, and shipping enterprise-grade products. Currently pursuing MCA while advancing expertise in cloud-native architecture and microservices patterns.

TECHNICAL SKILLS

Languages	JavaScript (ES2022+), TypeScript, Python 3, PHP 8, Core Java
Frameworks	Angular 16+, React, Svelte, FastAPI, Flask, Codelgniter
Databases	MySQL, MariaDB, Azure SQL, Supabase (PostgreSQL)
Security	JWT, OWASP Top 10, API rate limiting, Role-Based Access Control
DevOps / Tools	Docker, Git, GitHub, RESTful API design, FileZilla
Testing	Unit testing, API testing — Jasmine (latest)
CI/CD	GitHub Actions
Cloud	Azure
Soft Skills	Technical leadership, agile ceremonies, cross-team mentorship, stakeholder communication

EMPLOYMENT HISTORY

Senior Web Developer | Technical Lead

Prudent Insurance Brokers

2022 – Present

- Architected Angular-based frontend modules for a Retail Insurance Issuance Portal handling thousands of daily policy transactions; reduced page load times by ~40% through lazy loading and OnPush change detection strategy.
- Designed and maintained Python (Flask/SQL) backend APIs with an average response time improvement of ~35% after query optimisation and connection pooling.
- Led cross-functional team in daily agile standups, reducing sprint carryover by an estimated 25% through clearer acceptance criteria and early blocker escalation.
- Mentored 3 junior developers via structured code reviews and architectural discussions, establishing team-wide coding standards aligned with OWASP Top 10 guidelines.
- Drove adoption of JWT-based authentication and RBAC across microservice boundaries, eliminating all recorded unauthorized-access incidents post-deployment.

Junior PHP Web Developer

Sharp Vision Consultants

2020 – 2022

- Developed and maintained PHP 7/MySQL modules for 5+ client-facing web applications, contributing to a 30% reduction in reported UI bugs through systematic QA collaboration.
- Built responsive front-end components using HTML5, CSS3, JavaScript and jQuery, improving cross-browser compatibility across Chrome, Firefox, Safari, and Edge for key enterprise clients.
- Participated in agile ceremonies (standups, sprint planning, retrospectives) and independently delivered 8+ features from requirement to production deployment.

Technical Trainer

Livewire India

2019 – 2020

- Delivered hands-on coding instruction in JavaScript, PHP, and Java to 100+ undergraduate students, achieving a session satisfaction rating above 90%.
- Mentored students 1-on-1 from concept to deployment across 10+ college-level web projects.

KEY PROJECTS

Retail Policy Issuance Portal

Stack: PHP 8, MySQL, JavaScript, REST APIs, HTML/CSS

- Built a full-featured online insurance marketplace with motor vehicle search, multi-gateway payment processing, and real-time admin analytics dashboards.
- Reduced policy issuance turnaround from ~12 min to ~4 min through workflow optimisation and asynchronous API calls — directly improving agent productivity.

Taabir – Crowdfunding Platform

Stack: Angular 16, Spring Boot REST API, MariaDB

- Engineered a GoFundMe-style platform supporting campaign creation, global donations, and story sharing for individual and organisational fundraisers.
- Designed RESTful API layer handling 500+ concurrent user sessions with secure financial data flows and rate-limited endpoints.

AuthWrap – JWT Authentication Middleware

Stack: Angular, Python FastAPI, Docker

- Developed a reusable authentication wrapper library for third-party API security with built-in rate limiting, reducing new endpoint integration time by ~70%.
- Plug-and-play architecture allows teams to secure new endpoints with under 10 lines of configuration — adopted across 3 internal services.

Employee Training Management System (LMS)

Stack: Angular 16, Python Flask, MySQL, JWT

- Delivered a Zoho Learn-style LMS with employee/department/training modules, task tracking, and calendar integration — serving 200+ users across 4 departments.
- Implemented three-tier RBAC (HR Admin, Manager, Learner) improving adoption rate and reducing support tickets by an estimated 40%.

EDUCATION

Master of Computer Applications (MCA)

2023 – 2027 (In Progress)

Indira Gandhi National Open University — Advanced algorithms, distributed systems, software architecture

Bachelor of Computer Applications (BCA)

Completed — First Division

Indira Gandhi National Open University — Programming concepts, data structures, software engineering

Diploma in Computer Science Engineering

Completed

G.N.D.I.T Rohini (Board of Technical Education) — Founded Cultural & Technical Clubs; served as President of the Cultural Club
